

Oak Hill Students using **HughesNet** for their Internet service need to have the satellite web acceleration disabled for the school computers to work properly.

Open a web browser and type **192.168.0.1** into the address bar. Click the **i** to the right of the language selection, it is a light gray circle and hard to see.

The screenshot shows the HughesNet HT2000W System Control Center dashboard. At the top, there are links for System Status, System Information, and English. A light gray circle with an 'i' icon is highlighted next to the language selection. Below this, there are input fields for SAN, ESN, and Diagnostic Code. The main content area is titled "HT2000W System Control Center" and includes a "HELP" section with links to Welcome to HughesNet, Additional Premium Services, and Customer Care. On the right, there is a "Data Allowance Status" section with two circular progress indicators: "Anytime Data" at 100% remaining (20.0 GB in plan, 20.0 GB remaining) and "Bonus Bytes" at 100% remaining (50.0 GB in plan, 50.0 GB remaining). Below these are "Allowance Resets" (24 days/10 hrs/19 mins), "Token Bytes" (0.0 MB remaining), and "Bonus Period Starts" (12 hrs/20 mins). A left sidebar contains navigation options: Home, Connectivity Test, Built-In Self Test, and WiFi Settings.

Expand **Web Acceleration** on the left side and click on **Control**. Click on the **Web Acceleration Enabled** button to disable Web Acceleration, button will turn orange. School devices can now connect.

The screenshot shows the HughesNet HT2000W Advanced Configuration page. The browser address bar shows "192.168.0.1/limited.html#/wac/control". The page title is "HT2000W Advanced Configuration" and includes links for Home and Reboot. The software version is 7.3.0.13 (M) and the date is 09/11/2020. The main content area is titled "Web Acceleration Control" and includes an "Acceleration Mode" section with a "Web Acceleration Disabled" button (highlighted in orange) and a "Click to enable web acceleration" button. Below this is an "MBX Reset" section with a "Reset MBX" button. A left sidebar contains an "Advanced Menu" with options: General, Web Acceleration (expanded), Control (highlighted), Diagnostics, and Installation. The footer includes "©2020 HUGHES" and "Activate Windows Go to Settings to activate Windows."
